OBJECTIVE

Motivated IT student at Nanyang Polytechnic seeking a junior developer role to build and automate internal tools using Python, JavaScript, and SQL. Strong foundation in data workflows and full-stack application logic

EDUCATION

Diploma in Information Technology

Nanyang Polytechnic · Singapore, Singapore · 2024 – Present · CGPA to date : 3.5 / 4.0

International Foundation Programme

RVi Institute · Yangon, Myanmar · 2023 – 2024

· Pre-university program focused on IT, Mathematics, and English

Basic Education High School Certificate

BEHS-6 · Patheingyi, Myanmar · 2011 – 2023 · 5 Distinctions (English, Mathematics, Chemistry, Physics, Biology)

PROJECT

Spectrum Fest – Interactive Festival Website

2024 | HTML, CSS, JavaScript

- Built a multi-page, responsive website for a fictional music festival
- Integrated filterable schedules, ticket plans, and dynamic UI components
- Enhanced user experience with dynamic page transitions, interactive filters, and visually responsive design elements.

Nestify – Smart Home Services Web Application

2024 – 2025 | Flask, Python, Firebase, Tailwind UI, Shelve

- Developed a full-stack web application that digitizes home maintenance and repair bookings, donation listings, and customer-staff interactions, with a focus on sustainability and real-time functionality
- Contributed to donation & chat features, using Firebase and Python for logic, image handling, and role-based content control
- Designed consistent, responsive components using Tailwind UI and Flask templates, and role-based control.

Data Analysis & Visualization Project

2025 | Tableau Desktop, Data Cleaning, Visualization Design

- Built a multi-page interactive dashboard to explore customer trends and transaction volumes
- Applied data profiling techniques and designed KPIs for decision-making
- Delivered final presentation using Tableau Story feature with summary recommendations.

Autosume – AI-Enhanced Recruitment Platform

2025 – Ongoing | React.js, Node.js, MongoDB, OpenAI API, Material UI

- Developed an end-to-end AI-powered recruitment system for resume ranking, job management, and interview scheduling
- Integrated GenAI for chatbot conversations, AI-generated emails, resume scoring, and interview summaries
- Collaborated on frontend modules and backend APIs, focusing on GenAI logic and HR automation features.

EXPERIENCE

Banquet Server (Part-Time)

JW Marriott Hotel

2024 – Present, Singapore

- Managed event operations including food service, beverage refills, and guest assistance during high-volume functions
- Developed strong interpersonal and communication skills through direct guest interaction and service delivery
- Adapted to unexpected challenges such as last-minute changes, enhancing practical problem-solving and decision-making under pressure.

Operations Assistant (Part-Time)

Sentosa Golf Club

2024 – Present, Singapore

- Supported event setup, logistics coordination, and customer service during tournaments and private functions
- Ensured smooth daily operations by assisting with guest registration, equipment handling, and venue readiness
- Strengthened teamwork and adaptability by working closely with cross-functional staff in a fast-paced environment.

SKILLS

Technical/Domain Skills

- React.js, Node.js, Flask, RESTful APIs
- Python, JavaScript (ES6), C#
- HTML5, CSS3
- Firebase Firestore, MySQL, MongoDB

- Tableau (Data Analysis & Visualization)
- Git, Agile Development Practices
- Basic Networking & Infocomm Security Concepts

Generic / Transferable Skills

- Proactive problem-solving & logical thinking
 - Strong attention to detail
 - Effective time management
 - Clear communicator & collaborative team player
-
